

ITALVISION PRESENTS

ISSUE # 1: WARDROBES

WHEN IT COMES TO
WARDROBES THE
DESIGN POSSIBILITIES
ARE ENDLESS

From **hinged and sliding** to walk-in wardrobes, our suppliers offer a huge range of designs to choose from or can manufacture to your bespoke specifications.

Finishes include veneer, lacquer, melamine, glass or laminate and are available in a wide range of colours.

Depending on your brief, we can offer either **fully carcassed wardrobes** or **fronts only** to work within a niche.

100%
MADE IN ITALY

SUPPLIER HIGHLIGHT: HOMES GROUP

Homes Group was set up in 1969 and today the company has a total of 5 individual brands, each offering their own unique style and products.

In 2009 Homes invested in a new headquarters, developing the group even further. The new headquarters is not only a new building but it has introduced a new approach to the way they work, improving efficiency, service and product quality due to their new state of the art systems.

Quality and design are paramount when it comes to Homes' products. Their team of in house designers have created an impressive range of innovative and contemporary designs which really push the boundaries, experimenting with new styles and combinations. All wardrobes are produced to a very high standard and each product undergoes strict quality checking to ensure that no product leaves their factory unless it is absolutely perfect.

ENVIRONMENTAL RESPONSIBILITY

100%
RECYLED MATERIALS

E1 STANDARD
ECOLOGICAL PANELS

FSC
CERTIFICATION

All products are made using 100% recycled materials meaning no trees are cut down in the process, and they have full FSC certification.

In addition our suppliers use E1 standard laminated ecological panels that meet current European and American requirements on formaldehyde emissions; they use water based paints that meet the very latest and highest of E.C. certifications; and all packaging and hardware components are 100% recyclable.

HINGED WARDROBES

SLIDING WARDROBES
