The **Tow Boat Ride** is a simple and effective solution to take your guests into an immersive thematic universe.

Aboard a themed boat, they will sail amidst sumptuous scenery, will be able to see the animals around them or will be immersed in a virtual world.

Accessible to younger children, this ride can be integrated both indoors and outdoors.

Offering two types of boats and therefore a capacity adaptable upon request, the Tow Boat Ride is also dedicated to the needs of large or small capacities. In addition, the circuit is fully flexible depending on the route you want to create for your attraction.

All boats are linked together by a cable and set in motion by the latter. This system makes possible to control the boats speed. The station stop when boarding and disembarking passengers is ensured by a boat declutching system.

Different forms of boats are available. The theming possibilities being infinite, you can come with your idea and we will study the best solution for your project.

The boats are available in two models, a 9-seater model and a 12-seater model.

Integration options for interactive or multimedia devices are available on request.

These devices will allow your guests to be part of their journey, to tell them about their adventures or even to inform them about the different animals or plants species that they will find around them.
