Current information on COVID-19

We as AStA would also like to inform the students about possible information about the new rampant virus.

**Classroom teaching will begin on 4 May 2020, see**

[https://www.htwsaar.de/](https://www.htwsaar.de/)

Current risk areas (as of 12.03.2020, 8:30 a.m.):

- France: Region Grand Est
- Italy
- Iran
- In China: Hubei Province (incl. Wuhan City)
- In South Korea: Gyeongsangbuk-do Province (North Gyeongsang)

**The following symptoms should be noted (flu-like):**

- Dry cough
- Fever
- Sniffles
- Lassitude
- Respiratory problems
- Neck Scratching
- headaches and aching limbs
- Nausea
- Diarrhoea
- Chills

**How do I bend forward and behave accordingly?**

Behaviours are identical to those for protection against influenza viruses: Washing your hands regularly and thoroughly, coughing and sneezing properly and keeping a distance from sick people - these are the most effective protective measures in everyday life. Shaking hands should also be avoided.

**On suspicion of infection:**

If you have recently had contact with someone who has been diagnosed with the virus, you should immediately contact a doctor or call 116117 and stay at home!
