Alcohol Free Hand & Surface Sanitiser

- Non-Alcohol based sanitiser
- 6 hour on hand affective time
- 30 day on surface affective time
- Benzalkonium chloride active ingredient
- Proven to Kill Coronaviruses among many others and NHS Approved
- Vegan and Halal friendly and no more dry hands!

Thermal Screening

Thermal measurement can be used as a significant indication of illness and a method used across industries to ensure the risks are mitigated for people and work and leisure environments.

Our Solution:

- Hikvision thermal measurement
 - Measurement Gate & Access Terminal
 - ± 0.5 degree accuracy or ± 0.3 with options
 - Standalone functionality
 - Adjustable tolerances

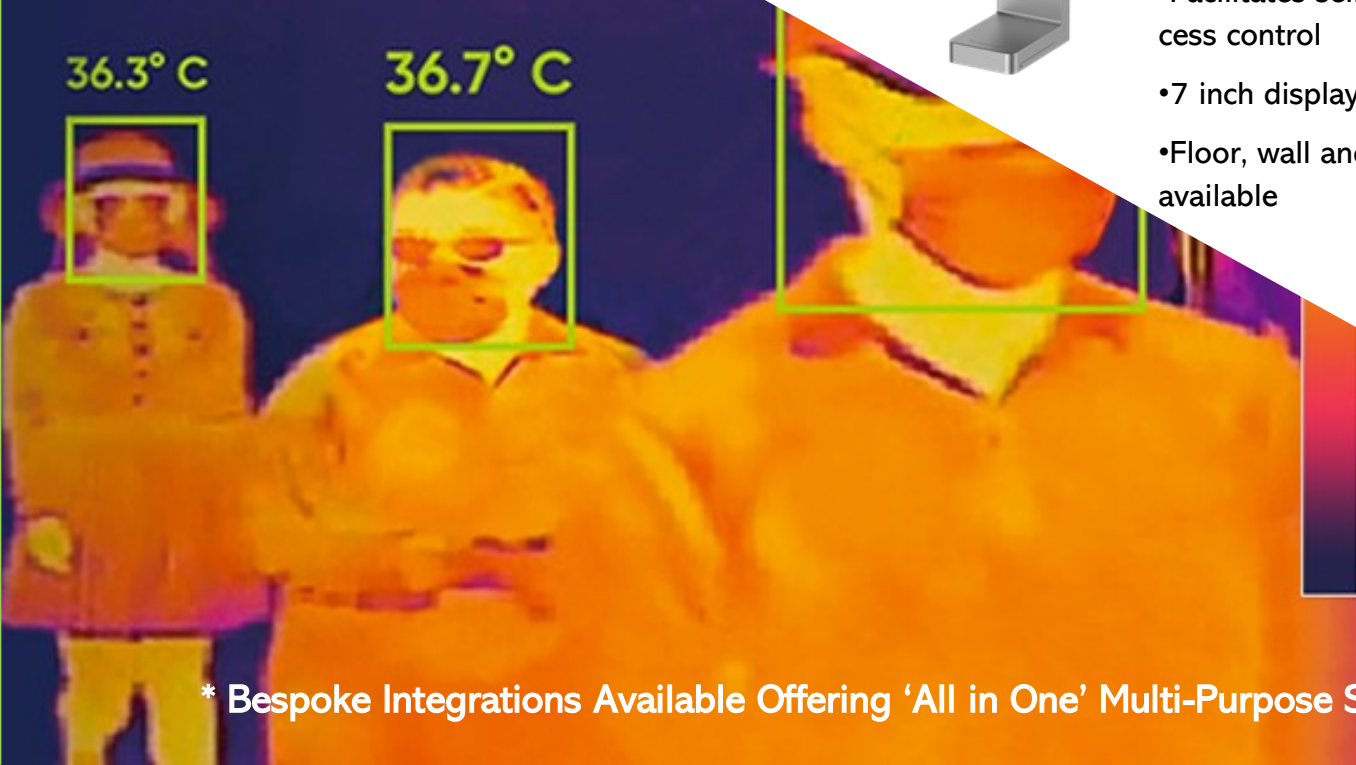

Screening Gate

- On-board thermal temperature measurement camera
- Light & Audia Alarm Built in
- Live display for real time skin surface monitoring
- Optional metal detection function
- Integrated to door lock systems
- Add calibration device for tolerance of ± 0.3 degree

Screening Tablet

- Ideal contactless doorway access
- Thermographic camera built-in delivering efficient real-time skin surface temperature measurement
- Face Mask detection
- Facilitates self-checking access control
- 7 inch display
- Floor, wall and table stand available

* Bespoke Integrations Available Offering 'All in One' Multi-Purpose Stations *

Ozone & UV-C Disinfection For Spaces

Both ozone & UV have long been used as technologies for disinfection and now have been adapted to disinfect spaces and the people using them. Our technologies utilise both ozone gas and UV-C for disinfection of spaces and ozonated water for safely disinfecting people and provide a proven method to reduce risk.

Disinfecting People

Sterilion Air

- Touch-less temperature sensor in built
- Touch-less automatic hand sanitiser
- Full body disinfection using ozonated water
 - Internal electrically generated ozonated water
 - Movable and retractable unit on wheels
 - Flow disinfection procedure
 - 750 or 250 people/hour capacity
 - Designed for either indoor or outdoor usage

Safeway Cabin

Disinfecting Spaces

- Choice of ozone or UV-C technology depending on your unique needs
- Disinfects surfaces & fabrics without left over stains
- Compact and portable designs available

UV-C

- Disinfection in 15mins and then ongoing
- No ventilation needed with standalone functionality
- Human safe options for working office spaces

Ozone:

- Works on a timer and then dissipates naturally
- Kills viruses and bacteria's and removes odour from space
- Disinfects up to 550m³/hour
- Sold with ozone detection device to ensure safety
