SPARE PARTS – OVERVIEW

Filter Elements
Filter elements are the core of every filtration system. We supply suitable elements for various applications and requirements.
Filter Candles | Filter Cartridges | Filter Bags | Filter Cassettes | Crossflow Modules | Custom Designs | Various Filtration Ratings

Seals & Wear Parts
Small components are essential for reliable system operation.
O-Rings | Flat Gaskets | Profile Seals | Sealing Sleeves | Wear Parts | Fasteners

Valves & Fittings
We supply suitable replacement components for safe and reliable filtration system operation.
Shut-Off Valves | Control Valves | Check Valves | Drain Valves | Compressed Air Components | Pneumatic Components

Measurement & Monitoring
Reliable monitoring of system parameters ensures safe and efficient operation.
Pressure Gauges | Differential Pressure Indicators | Pressure Switches | Sensors

Filter Housings & Components
Individual filter housing components can also be replaced or renewed.
Housing Covers | Filter Mounts | Brackets | Clamping Devices | Connections | Venting & Draining Components

Special Spare Parts
Need a spare part that is obsolete or difficult to identify?
We assist with technical identification and compatibility checks and assess suitable alternatives.
Discontinued Parts | Special Components | Custom Parts | Updated Designs | Technical Alternatives

SPARE PARTS

THE RIGHT SPARE PARTS FOR YOUR FILTRATION SYSTEM

WHY GENUINE SPARE PARTS?

Perfect Fit
Genuine parts are designed to fit your filtration system and its components.

High Quality
Meet the manufacturer's quality and performance standards.

Operational Safety
Essential for safe and reliable system operation.

Reliability
Reduced risk of faults, failures and premature wear.

Compatibility
Designed to work with other system components.

System Availability
Suitable parts help reduce unplanned downtime.

Value Retention
Genuine parts help preserve system function and value.

Tested Design
Components designed for the specific filtration system.

Traceability
Genuine parts ensure traceable origin and identification.

Longer Service Life
Quality parts reduce wear and extend system life.

FREQUENTLY ASKED QUESTIONS

How do I find the right spare part for my filtration system?
Simply send us the part number, nameplate details or a photo.
We use this information to identify the correct component.

Do you also supply filter elements from other manufacturers?
Depending on the application and design, suitable alternatives may be available.
Key factors include dimensions, filtration rating, material and operating conditions.

Can you source spare parts for older filtration systems?
Yes. We help identify suitable spare parts and alternatives, even for older systems.

How quickly are spare parts available?
Lead times depend on the component and availability.
For urgent needs, we check the fastest sourcing options.

Can spare parts be replaced during maintenance?
Yes. Required parts can be identified and replaced during scheduled maintenance.

What if I don't know which spare part I need?
Send us photos of the component and system nameplate.
Our experts will help identify the correct part.
