

PRIMA•port

ADVANCING SURGICAL POSSIBILITIES

PRIMA•port

The Prima port is available in 3 different tip configurations (bladed, bladeless and optical) and comes in a wide variety of diameters and lengths, accommodating all types of laparoscopic and robotic surgery. Additionally, the Prima port is available in sets which include 1 cannula and 2 sleeves allowing for greater cost efficiency during a procedure.

- **The Bladed trocar** has a safety shield to reduce the risk of vascular or visceral injury during entry to the abdominal cavity.
- **The Bladeless trocar** has an oval tip to reduce the insertion force and prevent unwanted damage.
- **The Optical trocar** has a clear tip allowing it to be inserted under direct visual guidance, minimizing the risk of internal injury.

The Prima port cannula is equipped with a flexible and detachable seal for maintenance of pneumoperitoneum during insertion and withdrawal of instruments.

For more information, please contact your local sales representative, or contact Lawmed on the details below.

Bladed trocar

Bladeless trocar

Optical trocar
