BEST PRACTICE

Wednesday 10th October

Prepare for MTDfB - AXiM & CONSTRUCT

Be prepared for 1st April. Making Tax Digital is not just an update to software. We will review the steps delegates should be taking now in preparation for this important change. This session is aimed at companies that run AXiM and Construct

In Conversation - Ian Saville (John F Hunt) - Building a business case for system improvement. Calculating a return on investment.

System improvements often involve cost and time. The hope there will be a pay off in terms of improved effectiveness and efficiency. Join us as we talk to Ian Saville, Group Finance Director at John F Hunt, about how he builds a business case and calculates return on investment.

In Conversation - Richard Christian (Ross Holdings) - The road to 204.2 and Simplified Payment Process

We talk to Richard Christian, Company Accountant at Ross Holdings, about the best way to approach testing the version 204.2 update and discuss some of the benefits including the new Simplified Payment Process.

Thursday 11th October

In Conversation - Michelle Boyle (mac group) - Improving the Accounts Payable Process

Join us as mac-group's Company Accountant discusses how they have increasing efficiency at head office and on client sites with improvements to the Accounts Payable process.

GDPR: Practical measures to keep data safe

Five months on from the implementation of new data privacy legislation we will look at practical measures you can take when processing the personally identifiable information of individuals to ensure you are adhering to the GDPR principles.

In Conversation - Keith Noddings (FT Group) - Planning for and managing to change

FT Group's Finance Director talks about planning for system change. We'll discuss preparing data and balancing the demands of a project alongside day to day workload.

In Conversation - Mo Dawood (Rhodar) - Mobile Timesheets

CONNECT2017 saw Rhodar's Payroll Manager discuss the introduction of Web Managed Timesheets and the huge benefits the project delivered. In this follow up session we talk to Rhodar's Group IT Manager about the incremental gains achieved by moving to Mobile Timesheets.

HANDS-ON

Wednesday 10th October

Making the most of Launchpads

In this hands-on session learn step by step how to assemble Tiles on a Launchpad.

Project Information Management

In this hands-on session we will take you through the basics of how to start your company's digital transformation. Content is growing at unprecedented speeds. Documents, invoices, emails, spreadsheets, drawings, photos, drone videos and BIM models are just some types of content that needs to be managed. We will step you through the process that begins with how to capture the content at the first opportunity then classify, index and tag it, and apply governance rules. You will learn how to control who can access it, and give people tools to find it quickly.

StreamBIM Setting up your Project

Get up close and learn how to get started with StreamBIM, load a model, understand how to get around it and learn about some of the features to make collaborating super easy.

Thursday 11th October

Business Analytics

In this session you will have an opportunity to get hands-on with Business Analytics. You will learn how to quickly access, share, tailor, and optimise your data analysis. Turn data into stunning reports and group collections of data views into information rich Launchpads. You will learn how to share and publish your data views, Launchpads, and reports through configurable security settings.

StreamBIM Defects Management/ Close Out

So you know what StreamBIM is, now understand how you can manage workflows, taking one use case of Defects Management, understand how you capture a defect, monitor and track actions and close out.

HOW TO

Cyber Security - Taking care of your business and yourself

In this non-technical presentation, we will discuss the latest hacks, security breaches and computer scams to demonstrate how cyber crime occurs and what countermeasures individuals and companies can take to be more cyber secure.

Launchpads

Launchpads give you the ability to curate sets of tiles adapted to your business needs and roles of groups or individuals users. In this session, our experts will demonstrate how to customise tiles for using images, graphics, and data to access your most used applications, forms, document repositories or reports from the launchpad.

Mobile Forms

In the era of mobile devices, wouldn't it be great to have users fill out forms from their phones, tablets, or lap tops. See how mobile forms can be customised to meet your company requirements. Discover how they can not only store custom data, but drive business processes like site diaries and time sheets, saving you valuable time.

Project Information Management

One of the fastest growth areas for RedSky. In this session you will learn how you can take full advantage of the information and knowledge embedded within the different types of content in your business. Documents, invoices, emails, spreadsheets, drawings, photos, drone videos and BIM model files are just some types of content that are growing at an unprecedented pace. We will show you how to capture, store, activate, analyse and automate business content, providing new value from data that was previously unstructured and unavailable.

Breakout 1

Prepare for MTDfB - Dema

Be prepared for 1st April. Making Tax Digital is not just an update to software. We will review the steps delegates should be taking now in preparation for this important change. This session is aimed at companies that run Dema

Breakout 2

Prepare for MTDfB - MENTOR

Be prepared for 1st April. Making Tax Digital is not just an update to software. We will review the steps delegates should be taking now in preparation for this important change. This session is aimed at companies that run MENTOR

Support - How to make the most of Customer Services

RedSky's Customer Services Director on the services available from Support. This session will explain the different levels of support available and ways in which customers can contact Customer Services for assistance.

Payrolling Benefits in kind

Are you considering payrolling Benefit In Kind (BIK)? This session will explain the considerations and setup required.

Reporting - Making the most of your data Analytics and Word reporting packs

Effectively and efficiently unlocking the data from within your RedSky system is critical to getting timely accurate and reliable information. During this session we will demonstrate how data can be easily accessed, managed, understood and delivered in meaningful formats to the right people at the right time. The session will walk you through how to work with Business Analytics and Word reporting packs that can combine multiple sources.

CONNECT 2018

INSPIRE

Wednesday 10th October

Welcome - Day 1

Phil Kent, RedSky's Managing Director welcome to the conference, signposting the sessions and activities that you can avail yourself of during the event.

RedSky Keynote

RedSky Keynote considering how industry trends and the latest technologies are shaping our products.

HMRC - Making Tax Digital

Making Tax Digital for business begins on 1st April 2019. Find out what Making Tax Digital means to you, including an overview of the consultations around specific elements of the Making Tax Digital reforms. An update on the MTD programme timeline, how the beta pilot program is going, and where MTD fits in to the overall Digital transformation Strategy.

Reporting - Making the most of your data Notifications, Word reporting and Web services

Working with your business data. We all recognize the need for analytic tools and applications, and that we need data mining and analysis for timely insights that can lead to smarter decisions, better plans, and more empowered employees. With this session, you will learn about what can be achieved with Notifications, Word Reporting and Web Services..

Prepare for MTDfB - Summit

Be prepared for 1st April. Making Tax Digital is not just an update to software. We will review the steps delegates should be taking now in preparation for this important change. This session is aimed at companies that run Summit.

Thursday 11th October

Update from Jim McFarlane, JDM Technology Group's CEO

A warm welcome to day 2 of the event. In a year when JDM Technology Group has already added six companies to the Group hear from JDM's owner and Chief Executive Officer, Jim McFarlane.

Update from Mike Aspinall, JDM Technology Group's - COO

JDM's Chief Operating Officer, Mike Aspinwall, provides a Group company update and shares key product strategies for the future.

User Group Committee Open forum / AGM

An open forum session to discuss how User Group activities and events can help members drive forward the use of RedSky systems. This session will be followed by the User Group AGM.

CITB - Apprenticeship Levy and accessing Grants

Hear from CITB with guidance and advise to help you train more, plan skills needs, and get the funding to do it. Boost productivity and careers in the industry.

In Conversation - Andy Finn (Rhodar) - Importance of business systems ownership

A lack of effective business system ownership can jeopardise long-term system success. In this session we will talk to Andy Finn of Rhodar about this often under developed discipline.

Hudson Contracts - The risks and rewards of using Freelance Construction Operatives

A welcome return of Ian Anfield, MD of Hudson Contracts. Ian will share his thoughts and update us on:

• the consultations around employment status
• the debate about the gig economy
• tribunal cases which could affect the use of self-employed labour such as Pimlico and Sash Windows

Hudson Contracts (www.hudsoncontract. co.uk) already provide services to a number of RedSky customers. Ian will bring delegates up to date on the overall service his company offers.

Improve the productivity of construction projects using 3D BIM

How can companies improve the productivity of construction projects by using 3D BIM? Level 2 BIM is distinguished by collaborative working. Collaborating can save costs and time, and make the construction industry save time and costs. Hear from Rendra AS's MD and CTO about how to get started with BIM and how to get from where you are today to where you want to be tomorrow. They will provide advise on how to lower the "Get started" barriers so SMEs start implementing new technology.

SPECIAL INTEREST GROUPS (SIG)

Thursday 11th October

Workflow / Approval; Update

A panel discussion looking specifically at Workflow & Approvals. An opportunity to review existing functionality and have input into future enhancement road map.

Payroll & HR

A panel discussion looking specifically at Payroll and HR. An opportunity to review existing functionality and have input into future enhancement roadmap.

Finance incl. Invoice Register

A panel discussion looking specifically at the Financial modules including Invoice Register. An opportunity to review existing functionality and have input into future enhancement roadmap.
