Products for the stainless steel sector

and additional specialist products
Welcome to METAFLUX!
The merger of German and Swiss production and distribution undertaking to establish an international brand that represents three principles to the forefront worldwide:

- highest possible technical quality
- comprehensive production program
- individual customer service

Metaflux products are their
Cheap!

Convince yourself of our high standards and be inspired by the Metaflux catalogs in the following areas:

- Metallic coatings
- Lubricants
- Multifunction sprays
- Welding protection
- Care, Cleaning

We are happy to advise you personally in your home.

Highly trained technical advisors will carry all products before directly from you - of course without obligation.

METAFLUX - Quality that convinces

Thus, year after year, newly developed products come into range, but for which unchanged apply METAFLUX principles:

- The highest possible technical quality
- Lowest possible contamination of the air in the workplace
- Ensures strict compliance with these Pm maximum protection of the environment METAFLUX Produkte in the future belong to the top international group.

For over 35 years Metaflux provides top-quality products for the treatment, processing and maintenance of stainless steel.

More than 100 years of stainless steel was developed and still new applications are discovered. Whether in industry, research, medicine, the environment and architecture, all stainless steel is installed or used. Especially in the chemistry of acid-resistant material can no longer be replaced. But even in the food industry can no longer dispense with stainless steel. In Germany, the following varieties are widely used:

V2A: The term V2A stands for "attempt melt 2 austenite". This alloy was created in 1912. In addition, it was then developed yet V4A.

V4A: In addition to the material V2A V4A has at least 2% molybdenum. This 2% molybdenum make stainless steel corrosion resistant to chloride media such as salt water, chlorine in swimming pools and much more. V4A also finds its use in the chemical industry.

The advantages of stainless steel are:

- Corrosion resistance
- Good editing options
- Weldability
- Longevity
- Easy care
- Hygienic

With over 40 Metaflux products in this catalog, we do our part for editing, processing and maintenance of stainless steel and thus contribute to the value preservation and appreciation.

Top products for stainless steel

CHALLENGE US!
Top products for the stainless steel sector

**70-56**

**Stainless Steel Spray**
- Color: Stainless steel color
- Temperature resistance: Up to 300 °C
- Metallic content in the dry film: 62%

**Advantages**
- Metallic surface coating with extremely high steel content
- Corrosion-resistant stainless steel coating from the tin combines the advantages of high-alloy stainless steel with which a weather-resistant layer is added and gives the surface metallic luster

**Applications**
- Safe adhesion on all metals, wood, cardboard, glass, ceramics and most plastics.
- Clean surface, remove rust, oil and grease completely, fixed colors or coatings can be sprayed.

**Application Areas**
- Chromium 18%, nickel 8%, manganese 2%

**Packaging**
- 70-56 400 ml spray
  - 1 unit = 12 doses

**70-78**

**Finishing Spray**
- Color: Stainless steel color
- Density: 0.86 g/cm³

**Advantages**
- Metallic surface coating
- Weather- and corrosion-resistant
- Highly abrasion resistant
- Fast drying

**Applications**
- Safe adhesion on all metals, wood, cardboard, glass, ceramics and most plastics.
- Clean surface, remove rust, oil and grease completely.

**Application Areas**

**Packaging**
- 70-78 400 ml spray
  - 1 unit = 12 doses

**70-03**

**Cutting Spray**
- Color: Whitish
- Density: 0.86 g/cm³

**Advantages**
- Fast heat laxative, cooling
- Avoids tarnishing at CrNiStahl and copper
- Adheres perfectly to curved surfaces
- Nitrite-free, hypoallergenic
- No aggressive additives, no disturbing odors
- Life of drill bits and cutting tools increases up to 100%
- Cutting performance of metal cutting saws increased up to 40%

**Applications**
- Universal cutting oil for all metals, from the hardest stainless steel and titanium to soft metals to as copper, brass, aluminum and cast iron. Universally applicable for all cutting and forming operations.
- Typical applications: metal drilling direct spray onto the drill or the surface to be drilled metal saws: along the cutting edge spray inner pipe thread: cutting spray adheres to the workpiece.

**Application Areas**
- Chromium 18%, nickel 8%, manganese 2%

**Packaging**
- 70-03 400 ml spray
  - 1 unit = 12 doses

**70-86**

**Ceramic Spray stainless steel**
- Color: White
- Temperature resistance: 1200 °C
- Resistance pressure: 2,200 kgf/cm²
- Density: 0.71 g/cm³

**Advantages**
- White ceramic cutting and sealing means
- Abrasion, disconnection, shock absorber
- Resistant to water, oil, gasoline and most acids and alkalis
- Prevents electro-chemical corrosion
- Even after a long time good De coated parts assembly

**Applications**
- Release agent for all screw, in particular for chrome-nickel fittings. Excellent also suitable for compensating inaccuracies on flanges and gaskets. Applying on Cleaned material (screw thread), Do not operate in oxygen and acetylene. System: Attention!
- Also available: METAFLUX 71-30 White ceramic paste (hot screw compound)

**Application Areas**
- Chromium 18%, nickel 8%, manganese 2%

**Packaging**
- 70-86 400 ml spray
  - 1 unit = 12 doses
Ceramic paste (hot screw compound)

- **advantages**
  - White ceramic cutting and sealing means
  - Abrasion, disconnection, slip-plug/ther
  - Resistant to water, oil, gasoline and most acids and alkalis
  - Prevents electro-chemical corrosion
  - Even after long time good dismantling of coated parts

- **applications**

- **application areas**
  - Secure release agent for all screw connections, in particular for chrome-nickel fittings. Particularly clean separation and sealants, excellent also suitable for compensating inaccuracies on flanges and gaskets.
  - Applying on cleaned material (screw thread).

- **packaging**
  - 71-0835 350 g tin
  - 71-3001 1 kg tin
  - 71-3010 10 kg container
  - 71-3020 25 kg container

Also available: 70-86 Ceramic Spray Applications: screws, fasteners, battery terminals, aggregates, bolts, gears, valves, pins and as a mold release agent.

70-81 / 70-85

- **Lubricating family**
  - **advantages**
    - Metal-filled broadband high-performance lubricant with titanium for extreme application conditions
    - Resistant to water, seawater, oil, petrol and most acids, alkalis, gases and vapors
    - Abrasion, turn-off and slip-plug/ther
    - Prevents galvanic corrosion Contact
    - Free of copper and nickel, so no electrolyte education possible

- **applications**

- **application areas**
  - Prevents galling, wear and corrosion to screw and plug connections, in particular with precious steel fittings; prevents vibration ge-noises (such as brake squeal) in all areas of industry, in the automotive sector, at wastewater treatment plants, in the port area in urban factories, hospitals, power plants, construction companies, etc.
  - Lubricating is very well suited for the stainless steel sector.

- **packaging**
  - 70-81 400 ml spray
  - 1 unit = 12 doses
  - 70-8500 1 kg tin
  - 70-8535 350 g tin
  - 70-8540 400 g cartridge
  - 70-6568 2 x 4 g packet
  - 1 unit = 100 pieces
  - 70-8130 brush adapter

75-56

- **Stainless steel Pflegereiniger**
  - Highly effective, nourishing cleansing emulsion. Cleans, maintains and protects in one operation. Removes easily to leave fingerprints and dirt without clearing stripes.
  - The cleaned surfaces shine like new and simultaneously obtain a water-repellent protective film.

- **advantages**
  - Ready
  - Removes fingerprints and light soiling effortlessly
  - Leaves at the same time a water-repellent protective film
  - No cleaning smear
  - Antistatic effect
  - Cleaned surfaces shine like new
  - Surfactants

- **applications**

- **application areas**
  - Applicable to: stainless steel, non-ferrous metals, aluminum, tiles and sanitary fittings.
  - Particularly clean and highly effective for all stainless steel, Alu and non-ferrous metal surfaces to remove deposits such as lime and cement, rust, tarnish, welding scale and light grease and oil.
  - The metals are brightened without attacking the base metal.

- **packaging**
  - 75-5810 10 l container
  - 75-5830 30 l container
  - 75-5862 200 l metal barrel

75-44

- **Clean-Nox (gel cleanser)**
  - Highly effective cleaner for all stainless steel, Alu and non-ferrous metal surfaces to remove deposits such as lime and cement, rust, tarnish, welding scale and light grease and oil.
  - The metals are brightened without attacking the base metal.

- **advantages**
  - Immediately ready for use
  - Free from salt, river, and nitric acid
  - Good adhesion on vertical surfaces
  - Brightens the metal without attacking the base metal

- **applications**

- **application areas**
  - Applicable to: Stainless steel, aluminum and non-ferrous metals. Surfaces where a slight improvement is desired.
  - Very good for vertical surfaces (no dripping).

- **packaging**
  - 75-6410 10 l container
  - 75-6430 20 l container
  - 75-6482 200 l plastic drum
## Top products for the stainless steel sector

### 70-32

**Stainless Steel Base Cleaner Spray**

- **Advantages**
  - Special cleaner for stainless steel surfaces
  - Removes even stubborn dirt
  - Also suitable for lime stains, verdigris, rust, scale,
  - Brightens
  - Economical in use

- **Applications**
  - Spray on stainless steel cleaner spray on soiled areas, act and polish thoroughly with a clean cloth in the grinding direction. Due to the high solid content of the can must be shaken thoroughly before each spray, with longer sprays also in between.

- **Application Areas**
  - Recommendation: protect 70-55 Stainless Steel Care Spray After cleaning the area with Metaflux.

- **Packaging**
  - 70-32 200 ml spray
  - 1 unit = 12 doses

### 70-55

**Stainless Steel Care Spray**

- **Advantages**
  - Special cleaner
  - Removes dust and dirt
  - No cleaning smears
  - Antistatic effect
  - Cleaned surfaces shine like new

- **Applications**
  - Medium operated. Highly effective special care product for stainless steel and tiles and smooth plastic surfaces in commercial kitchens, Catering Equipment, Kitchens, hospitals. Near insurance, elevators, banks, chromium nickel processing plants, etc. Stainless steel care spray, spray in the catering evenly on the surface to be cleaned, leave for a short and with lint Rinse-free, dry cloth. New contamination by fingerprints etc. can be easily removed with a dry cloth.

- **Application Areas**
  - Can be used in: steel processing, industrial kitchens, hospitals, Ho means of, restaurants, food plants, country, farmer economy, maintenance and service, automotive, railings, garden and landscaping, grant public facilities, laundry and toilet, industry and trade enterprises.

- **Packaging**
  - 70-55 400 ml spray
  - 70-5501 100 ml spray
  - 1 unit = 12 doses

### 75-05

**Stainless Steel Foam Cleaner**

- **Advantages**
  - Special foam cleaner for stainless steel
  - Quickly and thoroughly removes light and medium soils from all stainless steel surfaces
  - Free from abrasives
  - Antistatic effect
  - The foam structure provides good and long-lasting adhesion to surfaces perpendicular right
  - Residue-free after processing

- **Applications**
  - Can be used in: steel processing, industrial kitchens, hospitals. Ho means of, restaurants, food plants, country, farmer economy, maintenance and service, automotive, railings, garden and landscaping, grant public facilities, laundry and toilet, industry and trade enterprises.

- **Packaging**
  - 75-05 400 ml spray
  - 1 unit = 12 doses

### 75-01

**Stainless Steel Care Spray NSF**

- **Advantages**
  - Stainless steel cleaning and care with NSF approval
  - Quick cleaning of stainless steel surfaces
  - Maintains and brightens
  - Protects against fingerprints and dirt
  - Reduces oxidation and corrosion

- **Applications**
  - For all brushed and satin stainless steel surfaces, especially in beverage, food and medical industries. For cleaning and maintenance of conveyor belts, machinery, industrial kitchens, elevators, stairs and other stainless steel parts. By the product the surfaces are processed quickly and easily. Dirt, dust and greasy fingerprints are removed.

- **Packaging**
  - 75-01 400 ml spray
  - 1 unit = 12 doses
Top products for the stainless steel sector

**Stainless steel pickling and polishing paste**

- **70-66**
  - Stainless steel picking paste
  - 1 kg tin
  - 1 unit = 25 pieces

**Liquid metal**

- **76-84**
  - Metaflux liquid metal has automatically the correct mixing ratio
  - 100,000 kPas
  - 10-15 minutes
  - Usa.
  - 1 kg tin
  - 1 unit = 25 pieces

**Technoflex PU adhesive**

- **76-60 / 61/62**
  - adheres to vertical surfaces
  - high weathering and aging resistance (UV-resistant)
  - Odorless
  - 3 mm / 24 hrs.
  - 1 kg tin
  - 1 unit = 25 pieces

**METACUT blade for chromium-nickel steel**

- **82-0030**
  - High performance disc with a very small slice thickness, especially for cutting work on the thin-walled plates, pipes, etc. in the stainless area, iron, sulfur and chlorine free (<0.1%), high cutting speed, long service life, clean cut surfaces, small burns.
  - Short cutting times
  - Cool cut
  - Low cutting width
  - almost burn-free cut

**Applications**

- Picking paste applied with a wooden spatula or brush and leave on for up to 5 minutes depending on the application. Thereafter, rubbing with a dry cloth and then wash with water.
- Polishing: Apply the paste with a damp felt or cloth, rub and leave it short. Thereafter, rubbing with a dry cloth and then wash with water.

**Application areas**

- Pickling paste for stainless steel, iron, sulfur and chlorine free (≤0.1%), high cutting speed, long service life, clean cut surfaces, small burns.

**Packaging**

- 1 kg tin
- 1 unit = 25 pieces
- each with 1 pair of protective gloves

**Advantages**

- Short cutting times
- Cool cut
- Low cutting width
- almost burn-free cut

**Applications as follows:**

- in the automotive sector for chassis and machine parts
- pipes, tanks, thread and more

**Also included are available:**

- mixing nozzle 76-83

**Caulking gun “Profi”**

- Cartridge support made of powder metal.
- Robust cartridge gun for use in the professional sector.

**Permanently elastic, adhesive strong 1-Kompo components**

- PU adhesives and sealants
- connects quickly and safely withand metals, aluminum, copper, stainless, hard plastics, glass, wood, stone, concrete with each other

**Technical data**

- Colour: grey
- Density: 1.98 g/cm³

**Pickling paste applied**

- with a wooden spatula or brush
- leave on for up to 5 minutes depending on the application.
- Thereafter, rubbing with a dry cloth and then wash with water.

**Polishing**

- Apply the paste with a damp felt or cloth, rub
- and leave it short.
- Thereafter, rubbing with a dry cloth and then wash with water.

**Caulking**

- with a wooden spatula or brush
- leave on for up to 5 minutes depending on the application.
- Thereafter, rubbing with a dry cloth and then wash with water.

**Technical data**

- Colour: grey, black, white
- Density: 1.98 g/cm³
**Accessories for the stainless steel sector**

### 82-5020
**Polishing Velcro adhesive disc**
Buffing wheel for mirror-polishing metals such as stainless steel, aluminum, bronze and brass. With the use of poly blue polishing paste, a mirror finish is produced at low speed after a short application. Easy to assemble and to move through the adhesive mechanism. Ideal for metal, boat building, shipbuilding and shop.

### 82-5021
**Polishing felt pad, ø 6 mm**
The surface refinement preprocess workspaces, in conjunction with polishing paste. The high elasticity even for polishing intricate. For men capable of such. As pressure and injection molds, zinc, crimping and cutting tools, dies, spinning, grinding, etc.

### 82-5025
**Polishing paste (blue)**
Polishing paste (blue) for polishing stainless steels and non-ferrous metals (ferrous metals). Economical in use and outstanding in the action.

### 82-0100
**Mini Pneumatic angle**
- 90° angled head
- compact design for working in confined spaces
- self-locking lever prevents accidental start
- ideal for grinding, cutting, polishing, deburring and rounding off sharp edges

### 88-1000
**Small Angle Grinders “Metabo W 14-125 Plus”**
- high torque to the powerful and fast cutting grinding
- robust, durable Marathon motor
- Metabo dual-protection technology for an extremely long life
- Aluminum die-cast gear housing: robust and resistant to wear
- Inox-Tacho-Constantmatic (VTC) full-wave electronics
- Metabo S-automatic: safety clutch
- Restart protection prevents unintentional machine start
- twist-proof protective hood, adjusted within seconds without tools
- Metabo “Quick”: quick tool change without key
- Overload protection by electronic monitoring of winding temperature

**weld stainless steel**

### 92-0008
**TIG wire INOX W2**
Austenitic stainless TIG welding wire for welding stainless steels. Low carbon content ensures high resistance to corrosion. The weld metal is easy to work and mirror polishing.

### 92-4014
**TIG wire INOX W4**
TIG welding rod for welding stainless steels. Niobium stabilization allows excellent weldability in all welding positions. Rippled seams, very good dripping behavior and good modeling. Welds have high resistance to intergranular corrosion and have a very high chemical resistance. Suitable for food processing industry.

### 13-40
**Special electrode for CrNiMo steels**
Special electrode for connections on stainless and acid-resistant CrNiMo steels. Perfectly smooth, regular, same color bead without penetration, corrosion resistant. The deposit is mirror-polished.

### 92-4008
Austenitic stainless TIG welding wire for welding stainless steels. Low carbon content ensures high resistance to corrosion. The weld metal is easy to work and mirror polishing.
Welding wires for stainless steel sector

**MIG wire INOX 2**
Austenitic Cr / Ni welding wire for welding stainless steels. Low carbon content allows high resistance to corrosion. Weld metal is easy to work and mirror polishing.

**MIG wire INOX 4**
Welding wire for welding stainless steels. Niobium stabilization allows excellent weldability and flat, spatter-free welds. Weld metal has high resistance to intergranular corrosion and has a high chemical resistance. Suitable for food processing industry.

**Tungsten electrodes**

**TIG electrode WT 20 (red)**
- Particularly suitable for welding with direct current.
- Longer life than pure tungsten electrodes.
- Good ignition, high arc stability.

**TIG electrode LaRC (gold)**
Novel universal to be used electrode that can be used both to direct as well as to alternating current. 100% free of radiation, longer service life than conventional tungsten electrodes, very good ignition, high current carrying capacity, optimum used for almost all metals, including steel, stainless, acid and heat resistant steels, nickel and nickel alloys, refractory metals such as molybdenum, tantalum, niobium and their alloys, copper, bronze, titanium and titanium alloys, silicon bronze.

**TIG electrode Celan (pink)**
Novel universal to be used electrode that can be used both to direct as well as to alternating current. 100% free of radiation, significantly longer service life than conventional tungsten electrodes, even when using older welders best results. Optimaly used for almost all metals, 100% reproducible welding results, on one side to be ground 28 degrees of the length with a fine diamond wheel.

**Accessories for the stainless steel sector**

### Grinding rollers (fins)

- **82-2700**
  - Grind for stainless steel, steel, nickel alloys, non-ferrous metals, non-ferrous metals, zinc injection, paint layers, wood, rubber and leather.
  - Item number | Designation | Size | Admission | Grain Size | Max. u./min. | Max. V./m.
  - 82-2700 | Grinding roll | 100 x 100 mm | 19 | 60 - Medium | 6000 x 32 m/s | 32 m/s
  - 82-2701 | Grinding roll | 100 x 100 mm | 19 | 80 - Fine | 6000 x 32 m/s | 32 m/s
  - 82-2702 | Grinding roll | 100 x 100 mm | 19 | 80 - Superfine | 6000 x 32 m/s | 32 m/s

### UF - Universal felt mat

- Nonwoven mats for fine grinding. Suitable for stainless steel, aluminum, brass and bronze.
  - Item number | Designation | Size | Grain Size | Max. V./m.
  - 82-5006 | UF - Universal felt mat | 152 mm x 228 mm | Rough | 100 k
  - 82-5007 | UF - Universal felt mat | 152 mm x 228 mm | Medium | 180 k
  - 82-5008 | UF - Universal felt mat | 152 mm x 228 mm | Fine | 280 k

### UF - Universal nonwoven roll

- The non-woven fabric rolls can be separated by hand to the desired length, suitable for fine grinding of stainless steel, aluminum, brass and bronze.
  - Item number | Designation | Size | Grain Size | Max. V./m.
  - 82-5003 | UF - Universal fleece roll | 115 mm x 10 m | Rough | 80 k
  - 82-5004 | UF - Universal fleece roll | 115 mm x 10 m | Medium | 100 k
  - 82-5005 | UF - Universal fleece roll | 115 mm x 10 m | Fine | 180 k
  - 82-5006 | UF - Universal fleece roll | 115 mm x 10 m | Superfine | 280 k

### TS - Fleece Velcro discs

- Item number | Designation | Size | Grain Size | Max. V./m.
  - 82-5000 | TS - Fleece Velcro discs | 115 mm | 80 k
  - 82-5001 | TS - Fleece Velcro discs | 115 mm | 100 k
  - 82-5002 | TS - Fleece Velcro discs | 115 mm | 180 k
  - 82-5003 | TS - Fleece Velcro discs | 115 mm | Superfine | 280 k

### Cleaning Tissues

- Quickly and thoroughly removes oils and fats, fresh paint and varnish residues, adhesives and bitumen. Ideal for cleaning hands without water.
  - PH Value | About 7.0 (at 20 ° C)
  - Type | Wet cleaning wipes for fast, len surface and hand cleaning
  - Features |
    - Perforated cleaning cloths
    - Tool and durable cloth
    - Pleasant citrus scent
Accessories for the stainless steel sector

### 75-71
**Microfasertuch**
- Dries and polishes all sensitive areas. The contaminated area before cleaning and polish with a dry cloth.
- Along with 75-01 stainless steel care spray NSF unbeatable for the food industry.

### 75-72
**Metavlies towels**
- Highly absorbent, washable
- Very soft, lint-free
- Also wet particularly strong
- Color white

### 75-17
**Glass Care Spray Plus**
- Special cleaner
- Cleans and protects all smooth surfaces
- Repels dirt without scratching

### 75-07
**Citrus Cleaner Spray**
- Dries and polishes all sensitive areas.
- Pushes dirt such as dust, pollen, nicotine, finger footprints and so
- Colorless
- PH value 7.0 (neutral pH)

### 84-0000
**ERS-cleaning Complete**
- Consisting of: 1 x AC Transformer 55/80 A (230 V) Futura 1.140
- 1 x handpiece, 1 x standard head 10 x optical fiber ribbons 1 x protective glasses, protective gloves 1 x METAFLUX 75-05 Stainless Steel Care Spray 1 liter of electrolyte liquid cleaner No. 75-47
- 1 x carrying case 1 x manual

### packaging
- 75-47 ERS cleaner B- 75-4705 5 l canister
- 75-4706 10 l canister
- 75-4720 20 l canister
- 75-4730 30 l canister

###称赞
- NSF unbeatable
- Color white
- PH value 7.0 (neutral pH)

**imprint**

Because of the variety of possible applications give neither the manufacturer nor the distributors at home and abroad expressly or implicitly a guarantee for certain applications results and their shelf life or for the life of the products.

Note: All information and application examples (Application pictures) in this Prospectus are based on years of experience in the production of chemical products and their uses. They also rely on external and internal tests in laboratories and in-house practice. Because of the variety of products and their availability, we recommend to place in each application its own operating experience based. For all products also technical data sheets and safety data sheets are available for the most recent version available. Furthermore, there are appropriate instructions on each individual pack.

Because of the variety of possible applications give neither the manufacturer nor the distributors at home and abroad expressly or implicitly a guarantee for certain applications results and their shelf life or for the life of the products.

UV-stable surfactants biodegradable according to EU directives non-flammable free of copper and nickel permanently seals adhesive prevents air contact resistance high pressure non-flammable
The METAFLUX program includes more than 75 self-developed sprays and more than 40 self-developed cleaner, and every year new developments are added. are unchanged in the METAFLUX-development always three principles at the forefront:

- The highest possible technical quality
- Lowest possible contamination of the air in the workplace
- Maximum protection of the environment

Strict adherence to these principles ensures that METAFLUX products include in future to the international top group.
