

Abortion Care

We offer At Home Abortion Pills (Telemedicine)

In response to the current Covid 19 pandemic, the government has approved the use of telemedicine for abortion care: for medical abortion up to 10 weeks.

This means that if you meet safety criteria to allow for medical abortion without a scan, the abortion medications can either be collected by you from a centre or posted to your home address after your consultation. Our Centres are also open and can arrange a face to face appointment if you need one.

Call our advice line on 0345 300 8090 to find out more information and discuss your options, if its difficult to talk at home, visit mariestopes.org.uk and get in touch using our web chat service.

Visit **[Mariestopes.org.uk](https://mariestopes.org.uk)** to find information about your choices.
No, judgement, No pressure. Just care, confidentiality and respect.
