PYTHON

TRE TORCE, UN UNICO CONCETTO: ERGONOMIA.

Ci siamo concentrati sullo studio di un'impugnatura che con l'inclinazione di 26° permettesse di puntare il fascio con il minimo sforzo.

Ma non ci siamo fermati a questo: spostando l'interruttore nella parte inferiore della testata abbiamo raggiunto il massimo della praticità e del comfort.

Anche il sistema di ricarica è stato completamente rivisto e modificato.

Un innovativo sistema di connessione magnetica permette la ricarica esterna. La batteria agli ioni di litio vi garantirà fino a 500 cicli di ricarica.

Una importante aggiunta è stata fatta per la sicurezza: nella parte posteriore della torcia è stata inserita una valvola di sovrappressione. Questa valvola garantisce che l'interno della torcia non vada mai in sovrappressione.

THREE TORCHES, ONE CONCEPT: ERGONOMICS.

We focused on the design of a grip with a 26° angle that would enable you to point its beam without any effort.

But that is not all: by moving the switch under the head, we achieved the ultimate in functionality and ease of use. The charging system has also been completely revised and modified: an innovative magnetic induction system enables external charging. The lithium-ion battery will guarantee up to 500 charging cycles. We added an important safety feature: a pressure relief valve built into the back of the torch. This valve ensures that the inside of the torch will never overcharge.

LED 1500 lumens

120 m

TROIS TORCHES, UN SEUL CONCEPT: L'ERGONOMIE.

Nous nous sommes concentrés sur la conception d'une poignée qui, avec son inclinaison de 26°, permettrait d'orienter le faisceau avec un minimum d'effort.

Mais nous ne nous sommes pas arrêtés là : en déplaçant l'interrupteur vers la partie inférieure de la tête, nous avons obtenu un maximum de praticité et de confort.

Le système de charge a également été entièrement revu et modifié.

Un système de connexion magnétique innovant permet une recharge externe. La batterie lithium-ion vous offrira jusqu'à 500 cycles de charge.

Un ajout important a été fait pour la sécurité : une soupape de sécurité a été intégrée à l'arrière de la torche. Cette valve permet de s'assurer que l'intérieur de la torche n'est jamais en surpression.

• L'azionamento dell'interruttore consente di passare dal 100% della potenza al 50% e al 30%. Azionando l'**INTERRUTTORE** una quarta volta, si aziona un flash a 10 Hz per segnalare situazioni di emergenza. Inoltre, tenendo l'interruttore premuto per circa 4 secondi, si azionerà il lampeggio di segnalazione nella parte posteriore della torcia.

• Successive activation of the switch cycles through three power levels; from 100% to 50% and 30%. A fourth activation of the **SWITCH** activates a 10 Hz flash to signal an emergency. Furthermore, keeping the switch pressed for about four seconds activates the flashing signal on the back of the torch.

• L'actionnement de l'interrupteur permet de passer de 100% de la puissance à 50% et 30%. En actionnant l'**INTERRUPTEUR** une quatrième fois, on actionne un flash à 10 Hz pour signaler des situations d'urgence. En outre, en maintenant l'interrupteur enfoncé pendant environ 4 secondes, le clignotement de signalisation s'activera à l'arrière de la torche.

• Ricarica esterna con connessione magnetica
• External charge with magnetic connection
• Charge externe avec connexion magnétique

- External charge with magnetic connection
- Charge externe avec connexion magnétique

- **Progettata per gli apneisti più estremi, la versione PURE è stata programmata per accendersi e restare accesa tenendo l'**INTERRUTTORE** premuto. Si spegnerà al semplice rilascio dell'interruttore. Nessun'altra opzione.
- **Designed for the most extreme freedivers, the PURE version is configured to remain on as long as the **SWITCH** is pressed. It turns off when you simply release the switch. No other options.
- **Conçue pour les apnéistes les plus extrêmes, la version PURE a été programmée pour s'allumer et rester allumée en maintenant l'**INTERRUPTEUR** enfoncé. Elle s'éteindra dès que l'interrupteur est relâché. Aucune autre option.

Valvola di sovrappressione
Pressure relief valve
Soupape de surpression

- *Studiata per chi ha l'esigenza di utilizzare la torcia in maniera tradizionale sfruttando sempre e solo la piena potenza. Azionando una volta l'**INTERRUTTORE** la torcia si accende al 100%. Al secondo tocco, la torcia si spegnerà. Tenendo l'interruttore premuto per circa 4 secondi si azionerà un flash a 10 Hz per segnalare situazioni di emergenza.
- *Designed for those who need to use their torch in a traditional manner, always on full power only. One **SWITCH** activation turns the torch on at 100% output power. A second touch turns the torch off. Keeping the switch pressed for about 4 seconds activates a 10 Hz emergency flash.
- *Conçue pour ceux qui ont besoin d'utiliser la torche de manière traditionnelle en exploitant toujours et uniquement la pleine puissance. En actionnant une fois l'**INTERRUPTEUR**, la torche s'allume à 100%. Au deuxième contact, la torche s'éteindra. En maintenant l'interrupteur enfoncé pendant environ 4 secondes, un flash à 10 Hz sera activé pour signaler les situations d'urgence.

super BELLATRIX

FASCIO VARIABILE

3 TORCE IN UN UNICO STRUMENTO

Azionando con un semplice movimento di scorrimento la testa anteriore, è possibile variare il fascio luminoso in modo semplice e veloce.

1- FASCIO LARGO 70°:

ideale per immersioni notturne;

2- FASCIO STRETTO 27°:

ideale per illuminare relitti ed anfratti;

3- FASCIO 140°:

svitando completamente e togliendo la testa anteriore,

è possibile ottenere un fascio ideale per video riprese.

VARIABLE BEAM

3 TORCHES IN ONE

By scrolling the torch head you can easily modify the light beam.

1- WIDE BEAM 70°:

perfect for night dives;

2- NARROW BEAM 27°:

perfect to light up wrecks and caves;

3- 140° BEAM: by removing completely the torch head you can obtain a perfect beam to capture videos.

FAISCEAU VARIABLE

3 TORCHES EN UNE

En faisant simplement glisser la tête avant, le faisceau peut être modifié rapidement et facilement.

1- FAISCEAU LARGE DE 70°

idéal pour la plongée de nuit ;

2- FAISCEAU ÉTROIT 27° :

idéal pour éclairer les épaves et les ravins ;

3- FEU 140° :

en dévissant complètement et en retirant la tête avant,

il est possible d'obtenir un faisceau idéal pour le tournage de vidéos.
