CSS Mission

Our Mission at CSS is to identify and build long-term relationship with our public, private, governmental and nonprofit sector customers by delivering them the high quality and cost-effective solutions.

CSS Objectives

CSS Objective is to focus on Priorities and by ensuring integrity, quality, and efficiency and maintain standards throughout our business process.

Core Competencies:

As companies look to maintain and enhance their competitive advantages in today’s rapidly changing world of technology, we at Client Software Services (CSS) can be a key partner in assisting and navigating your operation through the complexities of the Technology Industry.

Software Application Development:

CSS as a firm believer and practitioner of the Agile methodology has applied this methodology to all its software development projects over the years delivering the projects effectively and efficiently.

Data Management & Analytics:

Perform an In-depth analysis of the customer’s big data management strategy, implement and maintain it. Just collecting right data and managing it for customers is not enough, applying the analytics to the value/results derived from the that data is important.

Software and Systems Integration:

Devops helps us develop a proven-effective product for managing the latest upgrades and operations. Also resulting with faster time to market, increase in frequency of production deployments and shorter lead-time for addressing issues and fixes leading to product accuracy.

Technology Focused:

- Quality Assurance, Business Data Analysis
- Software Architecture, SDLC
- SQL/Oracle/ETL/IBM IIB/MDM/Hadoop/Big Data Applications
- Java/J2EE & .NET
- Salesforce
- Application Programming
- Database Administration
- IT Project Management
