€

Wedge air cushion,
recommended for
wheelchairs.
Made of 75 polyester, TPU film.
Viscoelastic 3D polyester cover
Maximum weight: 150 Kg.

HOW TO USE:

It has an innovative mechanism regulated by a valve. It allows automatic entry and exit of air. In this way, the user or patient can regulate at his comfort the dimensions of said cushion or pillow in a comfortable way and without any apparatus, bowler or the like. It is also important, that being made of memory foam memory, is able to maintain the shape marked by the user.

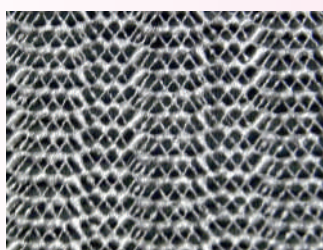

Confortus cushion with independent cells.

The independent cells distribute the cutaneous pressure, facilitate the circulation of the blood and prevent eschar.

They are obtained from a valve or two, for those users who need to correct the posture. The cover has anti-slip material in the bottom and elastic and breathable fabric in the upper part.

It is delivered with bowler to inflate.

€

Urinal Wedge

Its use is well known in prostrate patients, in order to facilitate the deposition of feces and urine. It is necessary not to have the wedge applied to the patient for a long time, since, being impermeable, it prevents normal perspiration and too prolonged contact can cause skin irritation. This material is very resistant to bleach and detergents, to blows and tears, and only deforms at temperatures well above the ambient.
