## CLARITY Convertible Pull Handle System

SOLVES CONVERTING A NON-LOCKING DOOR TO LOCKING

BY NELLO WALL

CLARITY's Convertible Pull Handle System: Change from a Non-Locking to a Locking Pull Handle using the Same Glass Door - on site and with minimal cost or disruption.

**CONVERT** a Glass Door from Non-Locking to Locking without buying a new door. It is a truly flexible system, as the locking and non-locking handles use the same holes in the glass door.

**UNIFORM DESIGN** appearance along aisles of glass office fronts. The aisle side of the standard handle is 44" high and at ADA clearance height.

**ACCOMMODATING** to all key systems in the locking handle. The system's handle accepts a rim cylinder which can be keyed by security to the building standard/master key system required by fire codes.

### FINISHES AND HEIGHTS

Available in CLARITY standard pull handle finishes: Brushed Stainless/Black/White/Bronze. Custom handle heights available to complete a design concept.

NON LOCKING 44"

LOCKING ADA 54/44"
