

UN-COUPLING MEMBRANES

Our Gypsum based levelling compounds eliminate the need for un-coupling membranes therefore reducing the installation time and overall costs.

GBLC PRIMER

Compatible with Gypsum Based Levelling Compound & Gypsum Based Tile Adhesive.

GBLC - GYPSUM BASED LEVELLING/SMOOTHING COMPOUND

A high quality, self-smoothing compound used for levelling uneven floors in preparation to receive most types of floor covering including vinyl, carpets, tiles and linoleum, recommended min thickness 3mm.

GBLC is compatible with Hemi-hydrate and Anhydrite Calcium sulphate screeds.

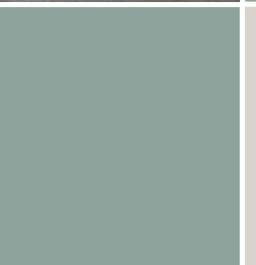

GBTA - GYPSUM BASED TILE ADHESIVE

Specifically formulated for use on calcium sulphate screeds and is ideal for interior use. On this type of screed, it is particularly effective at higher floor relative humidity (up to 85%) where opc based adhesives may delaminate. Gypsum based tile adhesive is not recommended in areas subject to continuous wetting such as shower rooms.

GBTG - GYPSUM BASED TILE GROUT

Gypsum based tile grouts are available in a range of colours that are made to order, call for details.

CREATIVE IMPRESSIONS

The **No1** choice when **working with**
Calcium Sulphate/Gypsum Screeds

Formulating, manufacturing and distributing for over 20 years,

Creative Impressions has established itself as a leading supplier to the decorative concrete industry.

As innovators we have pioneered many products and systems for the industry, and currently export products to over 75 countries worldwide.

Our product range includes Colour Hardeners, Dry Shake Toppings, Cementitious Coatings along with Specialists Screeds and the associated products and tools.

Over the years Creative Impressions have built up a team of highly skilled professionals with experience of the Coatings, Construction, Pre-Cast Concrete, Industrial Flooring, Ready Mixed Concrete and Mortar industries.

The latest addition to our team is Technical Manager Mr Sabo Bello-Saad, who has previously worked for Tarmac and Corus and brings with him a wealth of knowledge, of the mortar, concrete and screed industries

The product has been in the market place since 2003 and to date has a proven track record, it is rapidly becoming established as the contractor's 1st choice when it comes to overlaying calcium sulphate screeds.

We offer a range of products specifically designed to complement calcium sulphate floor screeds

BAGGED PUMPABLE GYPSUM BASED FLOOR SCREED

- **GB FLO bagged screed**, when added to the requisite amount of water produces a flowing screed that requires minimal dapping for a smooth and level surface to SR2 of BS 8204:2 2003.
- **GB FLO** is designed with a quality anhydrite binder combined with specially selected 0-4mm aggregates. The screed can be used to prepare a wide variety of sub floors to receive tile, carpet, resilient flooring, wood flooring and many types of surface finishes.
- **GB FLO** is amenable to hand mixing using drill and paddle mixer for small jobs.
