NOTICE: Creative Impressions Ltd only obligation shall be to replace such quantity of product proved to be defective. User shall determine the suitability in connection therewith. Since this product is used under conditions beyond the control of the distributor, neither the manufacturer or the distributor can assume any liability for the results obtained or damage incurred in excess of the purchase price of the above mentioned product © Creative Impressions Ltd. 1992.

Please note: All colours shown on this card approximate the actual finished colours as accurately as possible. However, colour hardener can be affected to some degrees by the surface texture, age, the light in which it is being viewed and exposure to heat and light. In applying colour toppings, variables such as finishing techniques, climate conditions and/or the water-cement ratio of the base concrete may affect the final appearance and colour intensity of any shake-on concrete surface hardener. Creative Impressions recommends requesting a placement of a representative test slab prior to actual concrete slab placement to determine application and finishing techniques for actual in-place appearance. Creative Impressions makes no warranty as to exact duplication of the colour shown above due to variables beyond our control.

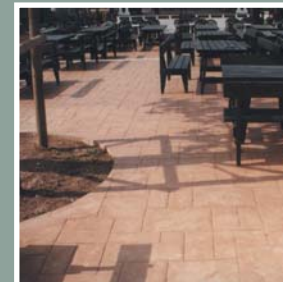

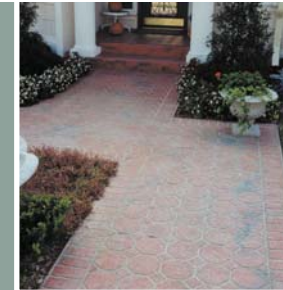

## The Permacolour™ Range

**Permanent** colours for **pattern imprinted** concrete

A range of high quality Dry Shake Colour Hardeners and Antique Release Powders that produce permanent, UV stable surfaces for Pattern Imprinted Concrete.

## The **Art** of Decorative Concrete

**CREATIVE IMPRESSIONS**

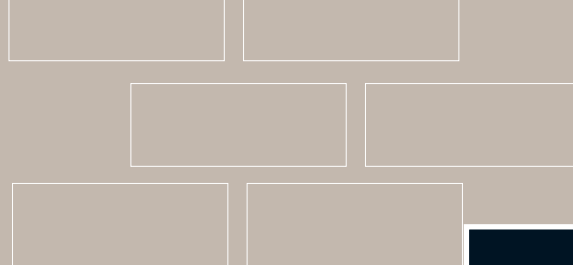

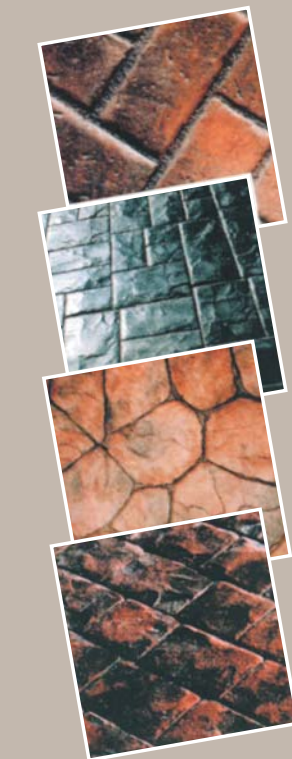

# The Permacolour™ Range

**DRY SHAKE COLOUR HARDENERS** - are a pre-mixed blend of specially graded aggregates, cement and light-fast UV stable pigments. Added to this are new additives that make **PERMACOLOUR™** hardeners easy to float with added workability. This increases hardener penetration of the surface and thereby creates a harder, longer lasting surface that resists abrasion. The **PERMACOLOUR™** range - available ex-stock in wide range of colours.

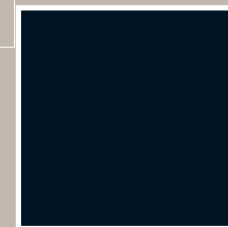

**ANTIQUÉ RELEASE POWDERS** - a specially formulated blend of ingredients acts as a parting agent to allow imprinting of the Texture Mats without any “lifting or pulling” of the surface. At the same time, pigment in suspension in the powder, is impacted into the surface during stamping and imparts the unique ‘antique’ effect to the resulting impression.

**LIQUID RELEASE - EFFECTIVE IN HIGH TEMPS** - Effective in high temperatures, prints texture without the powder and less clean up. Imparts antique effect when used in conjunction with colourtint.

Colour matching service - we can blend and match any colour to order - please call for further details. Please see our colour chart.
