

Spraycrete™

Creative Impressions **SPRAYCRETE™** transforms ordinary plain concrete or tarmac into a beautiful practical surface that looks like stone, slate, brick or tile. **SPRAYCRETE™**

offers higher strength properties than conventional concrete and is more flexible and durable. The finished **SPRAYCRETE™** surface is finished with a coating of Superseal acrylic sealer to provide high abrasion resistance and an easy to clean surface. **SPRAYCRETE™** coloured cement coatings offer an attractive and durable finish at an affordable cost, making it the perfect choice for both commercial and residential installations and for both interior and exterior use.

TECHNICAL NOTE: Detailed application instructions are available on request.

Transform dull grey
concrete or tarmac
with colour and texture!

Spraycrete™

Polymer Cement **Spray Coating**
FOR FLOORS AND WALLS
SPRAYCRETE™ ADVANTAGES-FLOORS

- **SPRAYCRETE™** - Naturally slip resistant and hard wearing finished surfaces. Available in 20 standard colours with a choice of designs.
- **SPRAYCRETE™** - Can be applied over existing concrete flatwork or tarmac (asphalt) at 2mm layer which permits all existing concrete falls and levels to remain basically unchanged.
- **SPRAYCRETE™** - Stencil patterns are uniform with shallow relief, so the finished textured surface has no deep crevices to trip on.

Spraycrete for walls...

SPRAYCRETE™ can be applied over a concrete block wall and using our newly developed **STENCILCRETE™** Face-Brick pattern stencil a realistic face brick effect can be reproduced over plain block walls.

Technical Note: SPRAYCRETE™ Polymer Cement Coatings are uniform in colour and resistant to yellowing or discolouration due to exposure to ultra-violet light. The internal polymer matrix of SPRAYCRETE™ polymer cement, provides excellent water resistance to decrease spalling, cracking and surface degradation caused by repeated freeze/thaw cycles, making it ideal to install, even in the coldest climates. SPRAYCRETE™ is also resistant to most industrial chemicals. Creative Impressions warrants its polymer modified cement material SPRAYCRETE™ against delamination from the concrete substrate to which it is applied for a period of TEN YEARS - subject to its warranty conditions.

Creative Impressions **Europe's number one** manufacturer of **quality products** for pattern **imprinting** concrete exporting **British quality** worldwide **since 1989**
