## BENEFITS OF SPAY/NEUTER

The health benefits of spaying and neutering are numerous. Altered pets have a much lower risk of reproductive cancers and generally live longer lives. Females will not go in heat (eliminating the messiness and anxious behavior associated with a cycle) or experience any complications during birth. Spayed females have less risk of mammary and ovarian cancer, and no risk of life-threatening uterine infections (Pyrometra). Males are less likely to engage in undesirable behaviors such as urine marking, humping, aggression, and roaming to seek out a mate. It also eliminates the possibility of testicular cancer.

## SPAY AND NEUTER CLINIC
