

Owning minted **24 karat, .999 pure gold bars** can mean the difference between life and death due to golds everlasting purchase power. For example, today a single ounce of gold can be converted to purchase many metric tons of wheat. That is fine for anyone who owns an ounce.

Of course not everyone can afford coins or bars that size. That is why **fractional sized gold** coins and bars are increasingly popular and, these product choices can be found at **Benchmark!**

Many investors are buying gold a tenth of a gram at a time because that fits their budget. While others are preparing for the possibility that gold will be a necessary medium to barter and trade for their families survival!.

## Fractional Gold Bars by the Grain

Grain (abbreviation gr.) the smallest unit of weight in the troy and the avoirdupois systems, (approximately 0.0648 grams). [because originally the weight was equivalent to that of a grain of corn.]

1/4 Grain 1/2 Grain 1 Grain 2 Grain

1 Grain 2 Grains 3 Grains

7.5 Grains

\*All gold bars are shown at actual size

Every bar of gold is weighed and checked using highly precise, laboratory grade: Ohaus and Sartorius scales which are accurate to .1 mg. This is done to insure that a Benchmark customer is getting the product they are paying for.

Actual Card Size 3.5" X 2"

## Benchmark Strategic Metals

takes great pride in offering the greatest number of sizes of fractional pure gold bars to the general public. Our investors are always satisfied, as well as stackers and preppers.

We offer the largest selection of sizes and weights as a measure of providence to make change when financial times are bad and there is really no good way to accurately break down large bars of precious metals without waste and loss.

\*Benchmark gold bars are pure...100% gold: no mixed metals, no plating, no layering, no 100 mil. Just real, pure, .999 fine 24 carat gold. Sealed with a certificate card so you can be sure that you are buying the real deal!!

## Benchmark Strategic Metals Offers Platinum & Silver

All Benchmark Precious Metals Are .999 Pure

## Fractional Gold Bars by the Gram

A gram is a unit of mass in the metric system defined as one thousandth (1 x 10<sup>-3</sup>) of a kilogram. An example of a gram is .035 ounces or four pinches of salt.

1/4 Gram 1/3 Gram 1/2 Gram

2/3 Gram 1 Gram 1 Gram

1/2 Gram 1 Gram 2 Grams 1 Pennyweight 1.555 Grams

1 Gram 1/10 Gram 1/10 Gram

\*All bars are shown at actual size
