Have your say in Worcestershire-wide Air Quality Survey

Residents across the County are being encouraged to take part in an air quality survey being conducted by Worcestershire Regulatory Services (WRS).

The survey, which is being delivered in partnership with Worcestershire County Council's Public Health Team, aims to gather valuable insights from the community to further enhance air quality monitoring and management efforts.

This comes in conjunction with a recent installation of 26 real-time air quality monitors located across the county as part of a three-year DEFRA-funded project to improve air quality in Worcestershire.

The survey will help WRS identify hotspots and ensure that their air quality initiatives align with the needs and priorities of the community, including health.

Head of Worcestershire Regulatory Services, Simon Wilkes, said: "Understanding what drives the behaviour of the residents and visitors is absolutely vital for us to help inform our efforts to create a healthier living environment for everyone in Worcestershire. Please do take the time to complete this survey and share your views."

Cllr Rick Deller, Executive Board Member for Housing and Regulatory Services on Wychavon District Council, added: "I am looking forward to hearing feedback from our residents about the air quality in our district. One of the reasons I moved to the area was because of the air quality and I am passionate to hear the community's thoughts. It will help us identify any problematic areas which would really make a difference to people of all ages in the district, and it'll take just 10 minutes."

Residents can share their views through the survey by visiting www.worcsregservices.gov.uk/airquality This survey should take no more than 10 minutes to complete and closes at 11pm on Sunday, 12 May.

The survey will cover various aspects of air quality, including perceptions, concerns, and suggestions for improvement. By actively participating, residents can contribute to shaping future air quality policies and initiatives tailored to meet the needs of the community.
