

# ESMIA

European Shipbuilding Mutual Indemnity Association

**GOVERNMENT'S  
BENEFITS**

# Benefits

## ✓New Jobs Creation

New jobs will be created in waterways transport Industry, ship management, crew, general and ship maintenance, construction and many other areas related to shipbuilding, logistics of transport, construction, cargo handling and Marine insurance industry

## ✓Lower Carbon Foot-Print - Green

It will fit into the general European environmental policy for reducing CO2 emissions. E.g. a barge carrying 4,000mt of grain is equivalent to 56 train wagons for carrying the same, multiple barges can be pushed / pulled by one tug therefore less environmental pollution

# ...Continue

## ✓ **Cost Effective Transport Infrastructure for the future**

Less heavy use of roads and railways therefore lower maintenance costs by the use of the cost saving transport namely ships/craft. Minimal water maintenance costs

## ✓ **Economic benefits from increase in the volume of Exported Goods**

Higher sales potentials of agricultural and non-agricultural export products

## ✓ **New Market Potentials**

New countries acquiring Ukrainian exported goods namely grain and oil Seeds, etc...

# ...Continue

## ✓ **Budget Planning benefits**

Lesser increase in the current road and railway maintenance, equivalent water transport maintenance costs are minimal in comparison to other types of transport maintenance

## ✓ **Time efficient infrastructure implementation**

5 years to build and implement targeted number of tugs, barges and floating craft to handle 20mmt of exports of grain, oil seeds amongst others...

## ✓ **Improved GDP**

Foreign investment to help build the waterways infrastructure, therefore additional international revenues adding to Ukraine's GDP
