

SUSTAINABILITY OUR RESPONSIBILITY

- SUSTAINABLE ENERGY SUPPLY**
- Our operational electricity requirements we cover with our own photovoltaic system.
 - We heat our greenhouses with sustainable combined heat and power (CHP) plants and two woodchip heating systems.
 - We cover our electricity and heat requirements exclusively with renewable energies
 - In this way we reduce our CO₂-emissions by 3,120 tons per year.

- ECOLOGICAL PLANT PROTECTION**
- We primarily use beneficial organisms as biological plant protection instead of chemical pesticides.

- WASTEWATER RECYCLING**
- We recycle our wastewater with a UV radiator wastewater plant. This reduces our water usage by 35%, the fertilizers no longer get into the groundwater and the nutrients and fertilizers can be reused.

- ENVIRONMENTALLY FRIENDLY PACKAGING**
- For our premium varieties we are using paper bags instead of plastic bags for protecting our roses against transportation and handling damages.

OUR ROSES ARE PRODUCED WITH
100% CO₂-NEUTRAL ENERGY

2024 VARIETIES

ROYAL BEAUTIES®

Wans Roses is a specialist for roses with particularly special flower shapes and blossom colours. Whether roses with the shape of the English garden rose, scented wedding roses or roses with exceptional blossom colours, we love them all.

To underline the individuality of our premium roses, we market our varieties under the brand Royal Beauties®.

For latest news on our varieties please also browse our website: www.wans-roses.de
