

Anti-Counterfeit Policy Statement

Energetics Technology Ltd places the confidence that customers have in our business and the products that we sell extremely highly.

As a manufacturer and distributor, Energetics Technology Ltd only supplies new components, purchased directly from original manufacturers or approved suppliers.

Our partners form a supply chain network of world-class original manufacturers and a collection of trusted authorised and accredited manufacturers. This ensures Energetics Technology Ltd customers should not be concerned about the possibility of counterfeits, as the chain of custody concerning a component cannot be comprised by external unauthorised interference.

Record keeping, inventory tracking and quality inspections maintain that components ordered from Energetics Technology Ltd are the highest quality.

Energetics Technology Ltd uses audited and proven suppliers for purchases of components and materials. These components are verified on receipt and held in a secure warehouse. Energetics Technology Ltd quality system is certified to BS EN ISO 9001:2015.

If any counterfeit product is suspected to have entered our supply chain, we have processes and mechanisms in place to identify that affected products are withdrawn from sale and securely quarantined. Where applicable Energetics Technology Ltd will also work with our suppliers to implement a product recall and assist our suppliers in verifying the authenticity of possible counterfeit products.
