Do you know that Non-Resident Hunters, Hunting on the over crowded public land, BLM, National Forest in the Western States have a 3% success rate? Each Western State shows that a Non-Resident thinking he is getting a hunt for a bottom dollar as a DIY and Hunts Public Land will come to hunt a western State 6 times before he shoots a Bull or a Cow elk. The western States will not tell you that and it is something I cannot Change, unless you hunt with me on the other side of the fence, on Private land at discounted rates.

What I can and do provide for my Hunters is let them hunt on my side of the Fence on Private game filled land in the western states so their success can go up to 99% success. I Provide these hunts for Deer, Elk, Antelope and even Moose across the west.

More important is that Watchdog can provide you with a dream that you have had for as long as you have hunted. Watchdog can guarantee you a private land hunt at a discount and a license to match for the rest of your life in the West for Elk, Antelope, Mule Deer, Whitetail Deer and even Moose!

Worried about the Preference Points issue, Watchdog can get you 4 points per year on these private land hunts, it gets no better than that to beat the point required to get a Big Game License in the west.

There is no one else in that world that can provide that dream, but we do, with a complete trademark ownership on Watchdog. A tool we use to see that every American that wants to hunt every year, for the rest of their life and not break the bank gets that opportunity.

I promise that and it is my dream that is now a reality. I have shot 2 Mule Deer, 2 Elk, and 2 Antelope every year for the past 20 years. Don't miss your opportunity, Life is only so long and the older you get the more physical disadvantages you have naturally or from a unplanned accident.

it is great to come home with horns and meat in the back of your truck every time, if you know how to shoot. The whole Watchdog program is a \$200 in depth package that we administer, that has been discounted down to only \$95 for the next 3 months then it will increase back up to \$200.

I cannot fix the western States Bull Elk License cost of \$ 680 plus another \$130 for other required licenses. But I can bring your hunter success up to as high as 99% so you take home something besides tired feet. I have mule Deer licenses that range from \$240 to \$400. Cow elk from \$288 to \$500, and antelope licenses for around \$350. That is part of the cost of hunting. Watchdog handles all the complex licensing for you. It even has your licenses mailed directly to your front door, while you sleep, or through the internet to your email.

Do not pass through life hunting and not taking home meat and horns. The animal populations are at a high level and hunts are available at a low-priced level, but we are 80% booked at this late time.

We are known for the highest success record anywhere, plus, also the best prices, we also allow you to do all of your price comparisons and research all in 1 location, www.DiscountedHunts.net You can even go out on the internet and you will see that we are 20% to 60% below market prices on our hunts. I am so certain about my Prices and success levels, That I stand beyond my statement, "If you find a Hunt at a better price at the same quality, I will go one it.

If you do not see what you are looking for just call me personally, I enjoy speaking with my hunters, and I will hand pick and email some hunts that match your desires and budget. Greg Merriam Discounted Hunts and Vouchers.

DIY Hunting on Private Land in the Prime area of Colorado... while they last!

Are you missing the easy draw units in the western states like Colorado because you do not know all the options, possibilities, hunts available? As your years tick by your walls are still missing big horns. You are not alone, the western states with Colorado being number 1 for complexity followed by Wyoming have great hunting but extraordinarily complex regulations. Their complexity provides Watchdog with its leading edge artificial license intelligence to get you licenses every year and build you profile so that you can pick your animal and state every year to always hunt where and how you want to every year. Do not worry about it and let watchdog do it for you. Watch dog will build a plan that will make it to where you will be able to not worry about the draw, and every year be able to get a license tag for you to hunt big Mule Deer, Big Bull Elk, Big Antelope, and Big Moose every year and begin getting into trophy areas to hunt, or moderately priced areas, DIY/Trespass Fee/Semi-Guided, Guided or Guided with Meals and lodging.

If you like to hunt this is the availability of a Magic Carpet ride into the best hunting licenses in the states and the opportunity to hunt the Best Private land hunts at Discounted Pricing.

[Watchdog® Your ticket to licenses for the rest of your life to the best private land hunting.](#)

Welcome to where the hills meet the plains, where antelope are You will have the opportunity of hunting up to almost 10,000 acres with private land interlocked with BLM land.

With a license that has a "O" for Open, designation you can hunt both and go directly from one to the other and back. On the licenses having a "P" for private means you can cross the public land to get to other private land you just cannot hunt on it. **This is a Private Land DIY/Trespass fee/Semi-Guided Hunt Opportunity** on a Great Out West Elk, Mule Deer and Antelope hunt.

Here is a brief description of the property in **GMU003 and GMU004**.

In **GMU003** the Main Property is 2500 acres of fenced Private land with no cross fences. It is surrounded by thousands of Acres of BLM on all sides. The property is **2,500 contiguous acres** or 4 one-mile sections. In addition, there are an addition satellite property of 320 acres, minimal pressure, with water and of course deer, elk, and antelope. The 5 Ranches with the land locked Public and interlocked land make up around 10,000 Acres and 5 Ranches.

It has at least 4 water sources year around mostly ponds and catch basins. The ground is mostly rolling sage, on sand hills with a mixture of small natural hay fields when the sage has been removed. The south end climbs up to the road altitudes and every thin is below that level. The moving spring water flows from north to south through the draws, some drying out and other emptying into different ponds.

The habitat is great for Mule Deer and Antelope in August, September, October, and November, then they migrate to lower ground to winter. The elk use the land basically traveling from North to south across the property enroute from the Bears Ears herd which numbers 60,000 traveling 27 miles west to Galina's Rim, 30 miles as the crow flies to the west and down at only 5000 feet in altitude. This is for elk like if we would spend the winter in Hawaii. Part of this 60,000 elk herd cross through this property but even with the excellent condition of the grass they usually do not stay on the property more than 24 hours, depending on hunting pressure as the herds pass through.

Elk are all about easy shooting with no trees and a good visual advantage make completing the harvest.

The deer and antelope are quite easy to hunt since they are in the prime habitat during the hunting seasons. For the Deer snow and harsh weather does enhance your odds for larger animals, along with the later in the season the more active the rut is but either way everyone goes home happy. The property abounds with 2-Track roads and high points, both are assets for the Safari Style, Drive, Glass, Spot and then stalk or just glassing from a high point for deer elk or antelope type of hunts for The Semi-Guided hunter.

In GMU004 there is 1225 acres of mixed habitat that begins north of Eastern Craig and travels north with highway 13 being its western boundary. The land has the fortification Creek, and irrigated hayfields that attract all wildlife and big game. There are some trees, but the hayfield in the bottom open to sage and scrub habitat as the property travels east to higher altitudes. This property is into the Bears ears foothills and the migration of deer and elk to lower ground as winter approached. There is also a local herd of Deer and Antelope. The water is always an attractant in a dry habitat like this high plateau desert habitat. The local deer begin being met with Mule Deer migrants as the days cool in late October, but the elk are later, using the snow in the higher altitudes to push them westward across the sage covered sand hills between highway 13 and Godiva Rim.

To break down the habitat it is a great mixture of 20 different Sage types, CRP, Hayfield, and irrigated pasture. GMU004 licenses for public land can be difficult to draw. This is Private land, so the Private land licenses with the "P" in the hunt code are much easier to draw. Many times, the land adjacent is BLM land, so a public land license can be a benefit and animals are chased between different fences.

This is a new opportunity for this ranch. GMU004 license for public land can be difficult to draw. This is Private land, so the Private land licenses are much easier to draw. Many times, the land adjacent is BLM land, so a public land license can be a benefit and animals are chased between different fences.

There are other properties that are intertwined with BLM land throughout the area, but I have never seen them to know their description. Mapping would show this. In most cases a PLO licenses restriction is not there for any animals except for Rifle Deer in GMU003 and Antelope in GMU003 and GMU004. The PLO's are easier to draw licenses in then Public land licenses.

For 3rd season the combo can be a Bull elk, with a deer or a cow elk because the migration weather is much more dependable, but the worse the weather the better the hunt. This package is defined above.

The Prices for a second animal as a Cow with a bull, or two cows, a doe Mule deer with the buck, and the doe antelope and even 2 doe antelope will be available. Drawing the licenses for them may be an even bigger task.

Our goal is to strive to have our hunters enjoy a safe and successful experience. Keep in mind our ranches are in Units GMU004 and GMU301, and in most cases the license is good for both units for elk. GMU003 is always tied in with GMU301. In all our hunts our goal is to do everything possible to make you successful.

NOTICE: Due to the high demand on these hunts the availability and sometimes prices are only confirmed up to 24 hours after this is sent to you. The only thing that holds the price and dates is the credit card charge or the receipt of a check from you received by us for that same deposit. This is the only way to be fair to everyone. If you have a group with a few of the last members still stumbling around on the decision to go or not they are risking your opportunity to go hunt at all. Book with what you currently have, and we will try to accommodate them when they do decide to go and supply their 50% deposit. In this way the ones that do want to go will not miss out because others can't make the decision. Opportunities with this high of a success rate at these low prices are limited.

The hunts with availability are noted with the (*) next to them designated as NOT Booked at this time yet but may be in that process.

If a deer Voucher is available, they are usually \$700-\$800 if available

Elk Hunting is always very weather dependent, warm weather retards their movement while cold weather and snow expedites their activity. You will always see more cow elk than bull elk, and because of that as it is in Whitetail deer for example the success rate is higher in does, or in this case Cow elk, than it is in Bull elk. This can make it beneficial in a par of hunters together to have a Bull license with one hunter and a cow license with the other so that you are prepared for anything that the weatherman throws at you. The Bull license are relatively easy to acquire, where the cow elk licenses must be drawn or left over. The best way to so this is to have Watchdog get you a Cow Elk license in March and a Bull Elk License in Late July. The second animal discount will work on this combination as well.

***3rd Season Deer and Elk GMU003 GMU004 (Only 7 Day season) 0 Preference Points on**

Cow and Bull. 1-2 Points on Deer. 1st 3 days and last 3 days hunts only.

Two hunts during the season. The first half is 3 days and the last half is 3 days.

The 1st half will be the most desired, but the 2nd half has better chances of weather, by 3 days, which is minimal vs the wide gap between 1st and 2nd season.

It is a full week later than last year. Recommend Deer and Elk, Bulls and Cows.

Maximum 10 Rifle hunters per 3 days season in GMU003 7-day total season, higher priced for the 1st half then the second half to fill both half's for maximum income. Only 6 for the second half.

Maximum 3 Rifle hunters per 3-day Hunts in GMU004.

This is a new opportunity for this ranch. GMU004 license for public land can be difficult to draw.

This is Private land, so the Private land licenses are much easier to draw.
