

## Dezerland Hollywood

Vehicles have always been an important part of filmmaking. By the 1930s camera cars, trailers, trucks, and other techniques to do mobile video production were already common. This photo program does not have any of trucks used, but it does have the cars that became popular in movies. As the sign says, "Cars of the Stars" on TV or the movies.

*Some of the car photos shown have been edited to improve the quality of photo.*
