

A Disney Springs Walkabout

Disney Springs in Orlando, Florida is one experience that can provide a lot of fun. Few rides, but a lot of sights, shows, eating and shopping opportunities. This photo programs takes you on a walkabout on a summer day.

AMPHICARS

An amphibious automobile suited for both land and water

The Model 770 Amphicar was named after its ability to achieve speeds of seven knots in the water and 70 mph on land. 3,878 Amphicars were manufactured in Germany from 1961 to 1968. During that time 3,046 were imported into the United States. The Amphicar is rear-engined and uses a 4-cylinder British-built Triumph Herald motor producing 43 hp. All Amphicars are convertibles, offered to civilians in four colors; Beach White, Regatta Red, Lagoon Blue and Fjord Green (Aqua). Two American Presidents owned Amphicars; Jimmy Carter and Lyndon B. Johnson. President Johnson would invite friends and even foreign dignitaries to his Texas ranch for a joyride in his car. Today, The BOATHOUSE is the only location in the world that offers Captain Guided Amphicar tours in a unique water experience around Lake Buena Vista, Florida.
