

Praying Thankful Prayers With Lego

You will need:

Lego, duplo or similar.
A base board would be useful but don't worry if you don't have one.

Did you know you can pray with lego?

You can, and we are going to give you four ways you can do this to say thank you to God. You could even mix them up if you want to! There are no rules, other than making sure you remember to pray!

Ponder

Think about what things you want to say thank you for today.

Something that has happened?

Something you have eaten or drunk?

Maybe a person or animal?

Anything else?

Get Ready

1. One way to pray with lego is to build something you're thankful for.

We built a house because we are thankful we have somewhere to live. (Although, where we live doesn't look like the model! Yours doesn't have to either)

2. If you don't like building models, why not do a lego picture of what you're thankful for? We did a flower!

It doesn't matter if it doesn't look very much like what you're thankful for - God will know and understand what you are building.

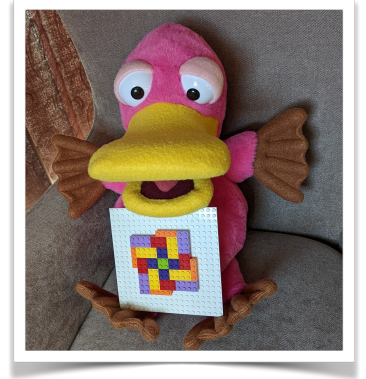

3. If you like to line things up, because that is something that helps you to think - you can do that too!

You could just think of the thing you are most thankful for as you you line up the bricks.

Or, you could think of something you are thankful for that is the same colour as the brick in your hand.

4. Maybe you like make patterns. Use one of the bases to make a colourful pattern with the lego. What colours are the things you are thankful for - use those colours to make a pattern. Or, Think of something you are thankful for that is the same colour as the brick you are putting into the pattern.

Pray

Say your prayers as you build, line up or create patterns. Tell God why you're thankful for them too. He knows why, but He loves to hear you tell Him.

Pondering Some More:

There will be people who don't have what you are thankful for. Think about them as you pray. Ask God to help them.
